

Play It Safe *with* Paul and Patsy PennDOT

Summer provides prime weather for road repairs, and Paul and Patsy are always prepared for slowed or stopped traffic when approaching a work zone.

What should you do?

- Prepare to change lanes as soon as you see a message for lanes closed ahead.
- Keep moving at the posted speed for the work zone.
- Drivers must yield right-of-way to workers and construction vehicles in active work zones.
- Rear-end collisions are common in work zones - double your following distance!

Remember:
Fines are doubled in work zones.
Motorists are required by law to use their headlights in work zones.
